Mint of the United States at Philadelphia, Pa.,

COINER'S DEPARTMENT,

January 27, 1886.

Hon. Dan'l M. Fox.

Superintendent.

Sir.

The balance, situated in the passage way leading to the Rolling room, used for weighing blanks & clippings to and from the Wash room being deficient in small weights, I have in accordance with your instructions inquired of Mr. H. Troemner relative to furnishing them, and he will make a set of Troy weights from 200 ounces down to the 100th part of an ounce, all finished and adjusted in strict conformity with the U.S. Standard, for Forty five (45) dollars, the weights below one ounce will be made of Aluminium; These weights are necessary, as we frequently have to wait

Hon. Danl. M. Fox
Superintendent,

Sir,

The balance, situated in the passage way leading to the Rolling room, used for weighing blanks & clippings to and from the Wash room being deficient in small weights. I have in accordance with your instructions inquired of Mr. H. Troemner, relative to furnishing them, and he will make a set of troy weights from 200 ounces down to the 100dth part of an ounce, all finished and adjusted in strict conformity with the U.S. Standard, for Forty five ($45) dollars. The weights below one ounce will be made of Aluminum; These weights are necessary, as we frequently have to wait at the scales for the reason that the weights on hand are in use else where, and I would respectfully recommend that the deficiency be supplied.

Very Respectfully,
Yours Obd. Servant
W.S. Steel
